
Texas Instruments presents the

NUMMABEAR CARLINGHARS

"They're
Tough."

Our Line of
Business Calculators.

Numbers, Numbers, Numbers.

Texas Instruments has a whole new way for you to deal with numbers. Number Crunchers. Business calculators that are tough. Every one of our business calculators is built to handle heavy workloads and rugged workouts. And they're reliable. Our Number Crunchers are backed by the Texas Instruments standard of quality so they take the crunching all day, every day.

So when you have to do anything with numbers... lots of numbers... get the business calculators that are tough enough to handle the job. The Number Crunchers. From Texas Instruments. See our complete line of Number Crunchers at your nearest Texas Instruments Dealer.

What They All Have.

- ☐ Easy-to-press sculptured keys for less fatigue, easy entry.
- ☐ Simple keyboard design gives quick reference.
- ☐ High speed printer, delivers 2.8 lines per second for fast operations using economical, standard 2¼" paper.
- ☐ Prints up to 12 digits plus commas, decimal point and two-column audit trail.
- ☐ Easy-to-read display and tape lessen eye strain.
- ☐ Long-detachable power cord so machine can be locked away securely at night.
- ☐ 10 levels of buffering prevent lock up under fast operation.
- ☐ Attractive low profile design to conveniently fit on any desktop.

Number Cruncher TI-5219

Our top-of-the-line printer-display calculator with memory offers all the basic accounting functions you need plus the added versatility of four-function memory. Its large vacuum fluorescent display adds the convenience of a bright, legible readout and the printer on/off switch lets you compute with or without a printed tape.

Number Cruncher TI-5213

Our most economical printing calculator has all the features and functions common to each calculator in the family. It combines the basic efficiency of a full-function commercial calculator with the reliability of an impact printer in a sleek, two-tone unit. The independent add register lets you operate this calculator as though it has memory.

Number Cruncher TI-5217

Our printer-display calculator which combines the permanence of printed tape with the convenience of a large, easy-to-read, 12-digit vacuum fluorescent display that shows commas, decimal point punctuation and status indicators for memory and independent add register.

Number Cruncher TI-5215

Our reliable printing calculator with powerful live memory. Add-to, subtract-from, subtotal or total memory without affecting previous calculations in progress. Combine this with the memory-like power of the independent add register, and you get the equivalent capability of a versatile dual memory.

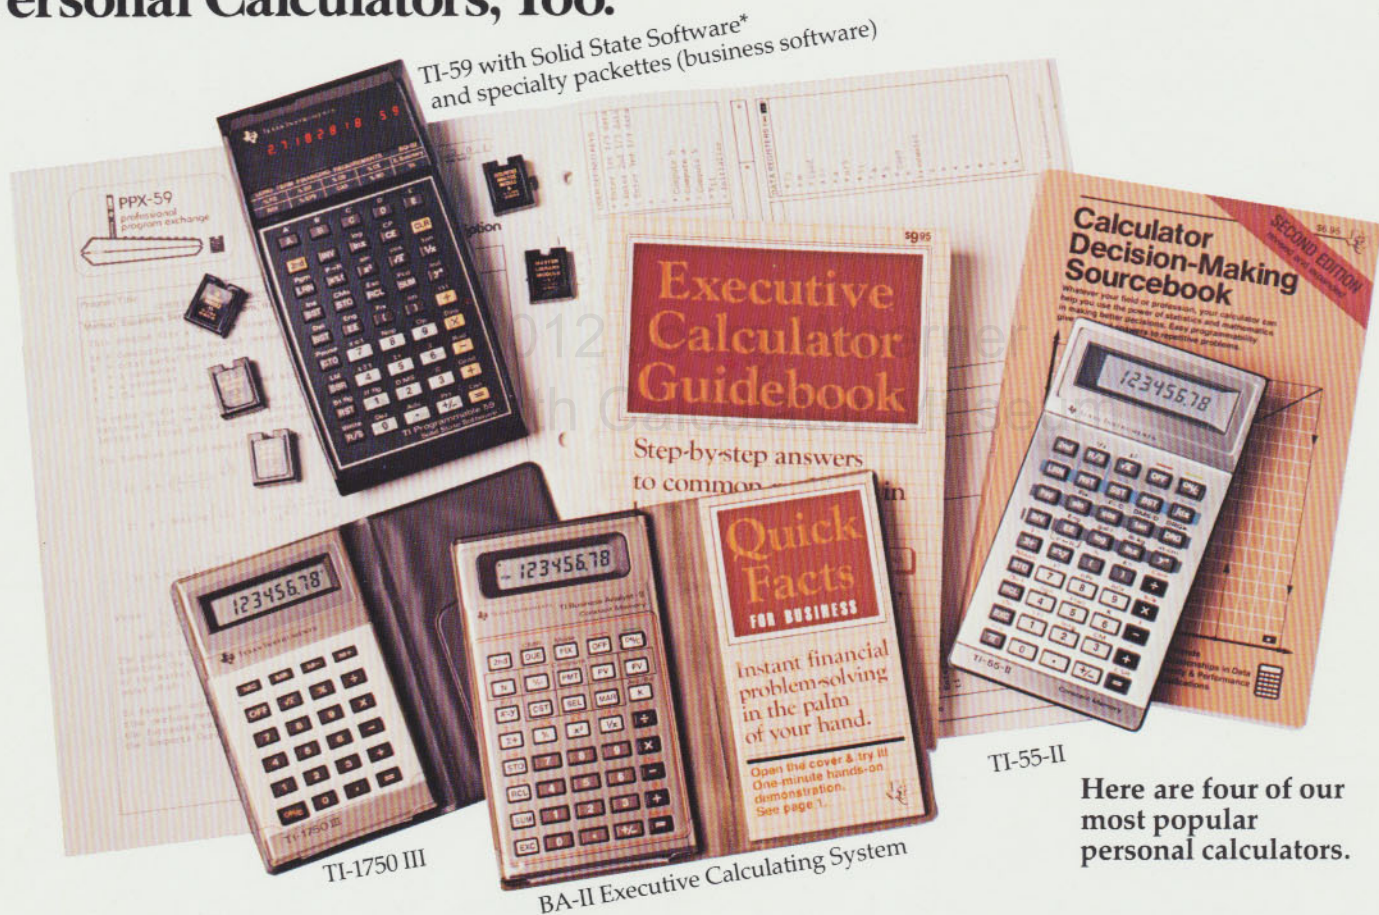

Common Features and Functions.

All models include automatic keyboard four-function constant, automatic computation of percentage calculations, independent add register, grand total register, grand total on/off switch, decimal selector, automatic rounding, item count, and non-add key for dating and numbering which simplifies labeling a tape without affecting totals.
